Summer Jobs for Students

This summer, JobOne CAREERS, in partnership with the Missouri Division of Vocational Rehabilitation, is providing a paid summer work experience for for three local students at Grandview Parks and Recreation.

Pictured are Gavyn and Griffin with job coach Joel working at the John Anderson Park in Grandview.

Three students are working as groundskeeping laborers for six weeks. These individuals will work primarily at Meadowmere and Shalimar Parks (Shalimar Park is the city baseball complex) and other locations as needed. Their job duties include daily upkeep and maintenance of the facilities. The students work four days per week and have one day in the classroom setting learning "soft" skills for future jobs.

JobOne & Eitas Bring National Employment Training Program to Local Hiring Professionals

JobOne's CAREERS program hosted a national Griffin Hammis training course in conjunction with Eitas on June 23rd and 24th in Kansas City. The theme of the training was Linking Discovery and Job Development: Foundations of Customized Employment. We had a great turnout with 53 professionals attended this 2-day training. The training focused on job creation for adults with disabilities.

This is one example of many opportunities we hope to bring to the local market in an effort to achieve more

Coming Soon: SDS Service & Capacity Improvements

In early September, JobOne's [Secure Document Solutions](#) (SDS) division will be installing a new industrial-sized Shred-Tech shredder. Shred-Tech has been a global leader in building information destruction and reduction systems for 40 years, pioneering development of mobile shredding operations. The equipment will double production capacity and facilitate continued growth of SDS's commercial customer base.

The new shredding system will allow JobOne to process four tons of material per hour. This upgrade will improve workflow and increase efficiency and safety by significantly reducing product handling and usage of ancillary equipment, while continuing to meet all NAID industry security standards.
